Permission granted to copy for non-commercial uses only. Visualizing Data Visualizing data is to literally create and then consider a visual display of data. Technically, it is not analysis, nor is it a substitute for analysis. However, visualizing data can be a useful starting point prior to the analysis of data.

In each section, there are some tasks, for which a possible solution is shown as some R code to be typed at the console (or cut-and-pasted from the PDF version of this document, or loaded from the accompanying .R R code files). Then there are some questions to answer, based on the output of the task.
