Climate change is a change in the statistical distribution of weather patterns when that change lasts for an extended period of time (i.e., decades to millions of years). Climate change may refer to a change in average weather conditions, or in the time variation of weather within the context of longer-term average conditions, defined by the World Meteorological Organization as a 30 years or ...

In my recent post on The Cosmogenic Isotope Record and the Role of The Sun in Shaping Earth's Climate an interesting discussion developed in comments where there was a fair amount of disagreement among my sceptical colleagues. A few days later, retired Apollo astronaut Phil Chapman sent me this article which lays some of the doubts to rest. Phil never got to fly in space but was mission ...

1. Introduction. Reducing risks to food security from climate change is one of the major challenges of the 21st century. The impacts of climate change on crop yield can already be detected in observed data (Lobell et al., 2011). Climate impact studies on crops predominate, but impacts on fisheries and livestock production are no less serious (Creighton et al., 2015, Herrero et al., 2015).

### **Reducing risks to food security from climate change**

February 2009. All countries in the world face challenges in dealing with environmental problems stemming from climate change. China's challenges in adapting to climate change are particularly acute as it is a country struggling to prevent even more pollution and natural disasters that stem, in part, from 30 years of unchecked economic growth.
