

**development of tripropellant cfd pdf**

DEVELOPMENT OF TRIPROPELLANT CFD DESIGN CODE 1.0 INTRODUCTION SECA, Inc. has developed a CFD design code to describe the operation of a tripropellant injector system, which, for example, utilizes both RP-1 and H<sub>2</sub> as fuels.

**SECA-FR-97-04 DEVELOPMENT OF TRIPROPELLANT CFD DESIGN CODE**

A tripropellant, such as GO<sub>2</sub>/H<sub>2</sub>/RP-1, CFD design code has been developed to predict the local mixing of multiple propellant streams as they are injected into a rocket motor. The code utilizes real fluid properties to account for the mixing and finite-rate combustion processes which occur near an injector faceplate, thus the analysis serves as a multi-phase homogeneous spray combustion model.

Development of tripropellant CFD design code : contract no.--NAS8-40583 : final report Author: Richard C Farmer ; Gary C Cheng ; Peter G Anderson ; United States.

**Development of tripropellant CFD design code : contract no**

Test cases have been simulated to describe an axisymmetric tripropellant coaxial injector and a 3-dimensional RP-1/LO<sub>2</sub> impinger injector system. The analysis has been shown to realistically describe such injector combustion flowfields.

Development of tripropellant CFD design code [microform] : contract no.--NAS8-40583 : final report / prepared by Richard C. Farmer, Gary C. Cheng, Peter G. Anderson Book Bib ID

**Development of tripropellant CFD design code [microform**

NASA presently is conducting studies into the feasibility of certain advanced concept rocket engines that could be utilized in a SSTO vehicle. One such concept is a tripropellant system which burns kerosene and hydrogen initially and at altitude switches to hydrogen.

**Development of CFD model for augmented core tripropellant**

Fluid (gas and liquid) flows are governed by partial differential equations which represent conservation laws for the mass, momentum, and energy. Computational Fluid Dynamics (CFD) is the art of replacing such PDE systems by a set of algebraic equations which can be solved using digital computers.

**Introduction to Computational Fluid Dynamics**

Development of a CFD model for propeller simulation 583. default 1.2 to 1.05 and sizing using body of influence was added (see Fig. 5). The outer mesh was defined to include as little nodes as possible, to decrease the need for computational power and minimize the computational time needed to converge the solution.

### **What is Computational Fluid Dynamics (CFD)?**

A sliding interface allows relative sliding of components. 1. Decoupled interface: the mesh is divided in different regions 2. Motion solver is applied to the regions 3. Interfaces are coupled: slave points are projected onto the master patch; the mesh is stitched 4. Fluid-dynamic solution is calculated 5.
