Debits and credits occur simultaneously in every financial transaction in double-entry bookkeeping. In the accounting equation, $Assets = Liabilities + Equity$, so, if an asset account increases (a debit (left)), then either another asset account must decrease (a credit (right)), or a liability or equity account must increase (a credit (right)). Note also that in the extended equation, revenues ...

Oxygen is a chemical element with symbol O and atomic number 8. It is a member of the chalcogen group on the periodic table, a highly reactive nonmetal, and an oxidizing agent that readily forms oxides with most elements as well as with other compounds. By mass, oxygen is the third-most abundant element in the universe, after hydrogen and helium. At standard temperature and pressure, two atoms ...

A basis of accounting is the time various financial transactions are recorded. The cash basis (EU VAT vocabulary Cash accounting) and the accrual basis are the two primary methods of tracking income and expenses in accounting.. Both can be used in a range of situations, from the accounts of a whole country or a large corporation to those of a small business or an individual.
